

DISCOVER

Code Willing's Discover Suite combines our CWIQ Feed for data collection with CWIQ Code capabilities for mapping and connecting data. Stored in the CWIQ File System we create your CWIQ Data Store for private, public or hybrid user access:

Data feed handlers for collection and monitoring of Exchange, Traditional and Alt Data

Permission user access to evaluate and/or full data production

Security Master delivered or integrated into your security master

Discover and optimize new and existing data strategies

Coded data to the Security Identifier to seamlessly connect your licensed and/or evaluation data
